Qorrex

qorrex.com

FOR BROKERS, WEALTH PLATFORMS AND ASSET MANAGERS

Your own tokenization platform, out of the box.

The platform already runs end to end. We launch it under your brand and on your domain. Verification, compliance rules, escrow and income payouts are built in. Your licensed partners stay yours.

A console for your team. A portal for your investors.

For your team

Create Listing · My Listings · Investors · Distributions · Documents · My companies

For your investors

Sign-in and verification · Offering page · Purchase · Token claim · Portfolio · Income claim

From the first call to your first offering, in six steps

Two set-ups: your brand on the front with Qorrex behind it, or a full white label.

// 01
Tell us what you want to launch
Qorrex maps your case and sends a written launch plan with the scope.

// 02
Set your brand and your rules
Qorrex applies your brand and sets the rules: allowed countries, investor categories and holder limits.

// 03
Connect your partners
Your platform connects your custodian and your verification provider, so that client keys never sit on the platform.

// 04
List your first asset
Your platform sends the asset to one approval step, then makes its token and its escrow.

// 05
Open the offering
Your platform verifies each investor and takes the payment in a stablecoin into escrow.

// 06
Close, allocate and pay income
Your platform gives each investor the token claim and the income claim, with a record of each step.

One platform, shaped to your asset and your market

A bullion dealer or a vault operator.
A gold platform

A regional arranger in Argentina.
A bond and private credit platform

A developer of rental buildings.
A rental property platform

A restaurant or hotel network.
Expansion capital for a franchise

A club for wine, whisky casks or watches.
A members' platform for collectibles

A regional fintech, broker or bank.
A marketplace for your customers

Built for serious issuance

Rules that fail closed
If a rule fails, the transfer does not happen.

Escrow per offering
Each offering has its own escrow, with refunds.

Exact allocation
Each investor claims tokens by Merkle proof.

Income by snapshot
A snapshot fixes each share of the income.

Keys stay with a custodian
A licensed custodian holds every wallet key.

Get your launch plan

Answer a few short questions. A manager contacts you shortly to go through your request.

Qorrex provides software for the tokenization of real-world assets. Qorrex is not a bank, broker, exchange, issuer or custodian. It holds no licence from any financial or virtual asset regulator, and it does not offer, sell, recommend or hold any token, security or other asset. Nothing in this document is an offer, a solicitation or investment, legal or tax advice. Each client is responsible for the licences, approvals and disclosures that its own activity requires. Tokenized assets carry risk, and investors can lose the amounts they invest.
